

Dealus

The Automated Commission Management Platform for Commercial Real Estate

As one of Central Kentucky's largest Commercial Real Estate firms, automation, accuracy, and efficiency are integral parts of NAI Isaac's operating strategy. The Dealus platform enables us to automate commission-related receivables and payables generation, effectively track commission allocations and payments, and improve the visibility of our deal flows. Dealus reporting dashboards empower our brokers to track their deal pipelines and forecast cash flows in real-time, a powerful tool aimed at motivating success.

David Woods | MSIRE, MAFM, MBA | Accounting Manager, NAI Isaac

Extending the power of RealNex to the back office.

With the RealNex Dealus integration CRM Projects can now be leveraged to drive advanced pipeline analytics and commission management. With one click any CRM Project can create a Deal in Dealus. Agent performance, cash flow forecasting, commission collection and distribution has never been easier.

RealNex is the Technology Behind the Deal.
